## PROJECTS

### ChatApp: ChatApp — *React.js, Express.js, MongoDB*

- Built a **full-stack real-time chat web app** using **React, Node.js, Express, and MongoDB** enabling one-to-one and group conversations.
- Implemented secure **JWT-based authentication and protected REST APIs** for login, signup, and user authorization.
- Integrated **Socket.IO** to support instant messaging, typing indicators, and live updates without page refresh.
- Designed a **responsive UI** using **Chakra UI** that works smoothly across mobile and desktop devices.
- Added features like **user search, notifications, group chat creation, and persistent message history**.
- Structured frontend communication using a centralized **Axios API layer** for scalable client-server interaction.
- Deployed the application with backend on **Render** and frontend on **Vercel**, configuring **environment variables and CORS** for production.

### Kawach: A Secure Document Sharing Platform — *React.js, Express.js, MongoDB*

- Created **Kawach**, a secure document-sharing platform using the **MERN stack**, with **end-to-end encryption** to ensure data safety.
- Developed a **time-bound QR code system** that automatically expires to prevent unauthorized access.
- Implemented **automatic removal** of documents from the **cloud** and **database** to avoid residual data.
- Delivered a **user-friendly, scalable solution** supporting multiple **file types**, reducing the risk of misuse.

### Quiz Play Learn: Smart Quiz Generator — *React.js, Express.js, MongoDB*

- Created an innovative education platform called **QuizPlay Learn** using **Next.js, React.js, Tailwind CSS**, and **MongoDB**. It allows students to upload **YouTube videos** and generate quizzes for self-assessment.
- Integrated the **YouTube API** to seamlessly process videos and automatically convert them into **personalized quizzes** based on video content.
- Engineered a **responsive UI** for **QuizPlay Learn** using **Tailwind CSS**, achieving **90+ Google Lighthouse score**, improving **accessibility**, and reducing **page load time by 0.7s** for enhanced user experience.
- Built a robust **backend system** with **MongoDB** and **REST APIs**, capable of handling high user traffic and optimized for **cloud deployment**.
- Incorporated **gamification features** such as **leaderboards** and **reward tokens** to enhance engagement, motivation, and long-term user retention.

## SKILLS

**Frontend:** HTML5, CSS3, JavaScript (ES6+), React.js, Redux, Tailwind CSS, Next.js

**Backend:** Node.js, Express.js, RESTful APIs

**Databases:** MongoDB, NoSQL, MySQL (basic)

**Tools/Platforms:** Git, GitHub, Postman, Vercel, Render, Cloudinary, Agile, VS Code, Socket.io

## EDUCATION

|                |                                                                     |           |
|----------------|---------------------------------------------------------------------|-----------|
| 2023 - present | B.Tech(IT) at <b>JSS Academy of Technical Education, Noida</b>      | 7.41 SGPA |
| 2022           | Intermediate at <b>Bhaurav Devras Saraswati Vidya Mandir, Noida</b> | 77%       |
| 2020           | High School at <b>Bhaurav Devras Saraswati Vidya Mandir, Noida</b>  | 82%       |

## ACHIEVEMENTS

- Participated in **two national hackathons**, demonstrating strong **problem-solving, software development, and teamwork** skills.
- Secured **10th rank** in the **Code Wizard 2.0 Hackathon** by building an **educational platform** using **React, JavaScript**, and **MongoDB**.
- Solved **500+ coding challenges** with a **rating above 1605** on Leetcode, showcasing expertise in **Data Structures and Algorithms (DSA)**, **C++**, and **Python**.
- Applied **algorithm design, time complexity optimization, and object-oriented programming (OOPS)** to solve real-world software problems.
- Explore my detailed problem-solving journey on my **GeeksforGeeks** profile.
